Office Action Summary	Application No. 10/826,608	Applicant(s) VIAUD ET AL.	
	Examiner Randy W. Gibson	Art Unit 2841	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 16 April 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Supplying the PTO with a German language EPO search report is not enough to meet the "concise explanation" requirement of rule 1.56(c), since in this case the concise explanation itself is not in English either. All that can be determined from the EPO search report is that the two foreign language references are "Y" type references; this is not adequate information in of itself to enable the examiner to determine if the factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a), are met by the disclosures of the two references.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2841

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Nahar (US # 5,143,164). Nahar shows a weight measurement device which takes a weight measurement of a load at two different positions (Col. 1, lines 55-68).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nahar (US # 5,143,164) in view of Vitunic et al (US # 4,909,338). Nahar discloses the claimed invention except for the functional recitation of “taking into account known mechanical properties of the machine”. However, Vitunic teaches that it is known to calibrate a scale of this type to correct for no-load and corner load errors (Col. 1, line 11 to col. 2, line 24). It would have been obvious to the ordinary practitioner to calibrate the scale of Nahar, as taught by Vitunic, motivated by the need to insure accuracy.

Conclusion

6. Claims 3, 5, 6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable over the art currently of record in the case if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
